Professional Quilting

for all your longarm
quilting needs!

TIP SHEET

From Your Longarm Quilter

Your Quilt Top:

- Seams pressed either to the side or open. No excessive fabric in seams.
- No embellishments (buttons, bells, sequins, or ribbons) You can add those later.
- Mark the top of your quilt with a tag.
- Trim any dark threads that will show through light-colored fabrics.
- Stay-stitching is nice, but not required... UNLESS you have a piano-key border.

Your Thread Choice:

- Glide Thread runs best in our Bernina Q24 longarm.
- Best practice is to use the same color thread on both top & bottom to prevent “pokies”
- Thread color is your choice unless you would like our professional opinion.

Your Backing:

- Backing needs to be 3” to 4” larger on all sides than the quilt top. This is to ensure that the side clamps can hold onto the backing fabric.
- ALWAYS leave the selvages on the outside edges of the backing. You should not leave selvages on an inside seam.
- Pieced backings—Horizontal seams are preferred, instead of vertical seams. If using vertical seams, do not choose a directional quilt design.
- Centering another quilt on the back of your quilt top is VERY tricky, BUT do-able.
- Wide backings (108” or larger) are less fussy than pieced backings.

Other Services:

- Trimming/Squaring
- Binding Services

Batting Options:

- Hobb’s 80/20 is used in the shop.
- Customer batting is always accepted.
- If using a pieced batting, please make sure that all pieces are the same type of batting.
- Do NOT pin baste top, batting and backing together. We layer each section separately on the longarm. Removing pins just takes unnecessary time.

Your Quilt Design:

- Good theme choices are: hobbies, floral designs, or geometrics.
- Quilting options include E2E (Edge to Edge), Borders and Corners, Block or motif placement, Ruler work, or complete Custom Design.
